

Tablecloth washing and mangling

Machine wash at 60°C with moderate amount of detergent.

Do not use any softener.

Stretch out the wet cloth immediately after washing. The cloth will shrink about 7%.

Best is to mangle the cloth while still wet from the washing machine.

Let it dry until 'nearly dry'. Then mangle it again and the linen luster will appear.

NOTE: If you first let it dry after washing, it is hard to get the wrinkles out completely.

If you do not have a mangle, you can use a 'wooden roll' available for purchase at Björke Vävstuga

Use the same 2-step procedure as described above. Then iron the cloth until fully dry.

Curtain washing and mangling

Measure the length of the curtains before washing.

Machine was at 60°C with moderate amount of detergent.

Use a short program with high water level and a short spin only.

Do not use any softener

While still wet, stretch them out till required length and mangle them.

Iron them lengthwise after mangling. Curtains will shrink about 2%.

NOTE: Do not use starch on curtains containing linen.
